Premium quality panel

Austral Multiply Furniture is a premium quality, furniture grade plywood panel, made from 100% Hoop Pine. Designed to make a feature of the edge, it is constructed using specially selected 1.5mm rotary peeled veneers, creating an even and aesthetically pleasing finish.

Suitable for many furniture applications

Austral Multiply Furniture is perfect for many furniture grade applications including tables, chairs, desks, benches and decorative partitions.

Grades available to suit your project

Austral Multiply Furniture is available in two grades depending on the requirements of your project.

- **A-C** is our premium grade Multiply. The face is typically consistent and uniform, and exhibits a warm, wood appearance.
- **B-B** presents a more natural appearance, using faces that exhibit natural characteristics. These include more swirling grain, colour variation and filled splits.

Both grades feature the same high quality "A" grade core, providing a premium edge finish.

White glueline

Austral Multiply Furniture is manufactured with a white glueline (E0, C-Bond) to enhance the appearance.

Size and thicknesses

Available in 2400 x 1200mm in either 18mm or 25mm thicknesses.

Approved and certified

Austral Multiply Furniture is manufactured to Australian Standards and is EWPA approved. Sourced from Queensland sustainable plantations, it is also RW certified and therefore suitable for Green Star projects.
